Quality Improvement Initiatives in the Government of India's RMNCH+A Strategy: Lessons from Chamba, Himachal Pradesh

ASSIST's India team started providing QI support in December 2013 to improve services at health facilities in Chamba district in Himachal Pradesh state. Within a few months, the district government saw good, sustained results from QI initiatives for the Government of India's RMNCH+A program and with ASSIST's support, the district government has been very active at all levels (facility, district, state) in scaling up QI. ASSIST documented its efforts Chamba through a video that highlighted how QI approaches can be used to provide better care in challenging areas of India and how governments can adopt these approaches using their own resources.
