El Salvador

As part of the Zika virus epidemic emergency response, ASSIST is providing intensive assistance to the Ministry of Health in El Salvador to conduct a baseline assessment, revise Zika-related clinical guidelines, train health care providers on counseling skills, improve Zika-related clinical processes, launch an accredited course on Zika-related health care, implement a Zika quality improvement program, and cultivate a Zika community of practice.

For more information on ASSIST’s work in El Salvador, please contact assist-info@urc-chs.com [1].
