How to Conduct a Gender Analysis

The USAID ASSIST Project integrates gender considerations in quality improvement in order to improve outcomes for all — women and men, girls and boys. ASSIST partner WI-HER, LLC developed an innovative and effective six-step approach [1] to help ASSIST teams integrate gender in order to identify and close gender-related gaps in improvement activities. This video explains the first step in detail: how to conduct a gender analysis.

You can find the gender analysis tools featured in this video here [2].
