ISQua Fellowship Webinar: Why standards or training do not fix all problems

[isqua_webinar.png](#) [1]

We typically try to fix problems in health care by setting standards or training staff. These interventions work for some problems but not for all. In this presentation, ASSIST's Nigel Livesley discussed some types of problems that require different solutions and how to identify these solutions.

[Watch the recording](#) [2] of this webinar to learn about:

- Some of the limitations of standards and training to fix problems in health service delivery.
- How to identify problems in processes of care that can be readily fixed.

Nigel also shared examples from hospitals and clinics in low- and middle-income countries of how health workers have used these approaches.

Presenter: [Nigel Livesley](#) [3], ASSIST's Regional Director for South Asia, University Research Co., LLC

Date: Thursday, July 6, 2017 - 08:00 to 09:00

Location: Online

Organization: ISQua

Topic(s): [Improvement Science](#) [4]
