Burundi

The project is working with the MOH to improve the uptake and quality of services to prevent mother-to-child transmission (PMTCT) of HIV and to provide community-level support to retain mothers and infants in care. Additionally, ASSIST is collaborating with PEPFAR implementing partners to improve retention in care and adherence to therapy for people living with HIV to meet UNAIDS 90-90-90 targets within the five PEPFAR-supported USAID priority provinces.

For more information on ASSIST’s work in Burundi, please contact assist-info@urc-chs.com [1].
