Botswana

Engaging with different levels of the health system, ASSIST in Botswana is working to strengthen the community health system response to HIV to contribute to epidemic control. The project applies improvement approaches to address quality and service gaps along the HIV care and treatment cascade and supports the scale-up of community-based provision of services in close collaboration with the Ministry of Health, district health management teams, and other PEPFAR implementing partners.

For more information on ASSIST’s work in Botswana, please contact assist-info@urc-chs.com [1].

The USAID ASSIST Knowledge Portal is made possible by the generous support of the American people through the U.S. Agency for International Development and its Bureau for Global Health, Office of Health Systems. The information provided on this web portal is not official U.S. Government information and does not represent the views or positions of USAID or the U.S. Government. The USAID ASSIST Project is managed by University Research Co., LLC under Cooperative Agreement Number AID-OAA-A-12-00101.
