South Africa

In South Africa, ASSIST works with the Department of Health and PEPFAR implementing partners to improve the quality and safety of medical male circumcision services. The project also works to capacitate the Department of Health staff at all levels on the use of continuous quality improvement methodology and tools and supports Technical Working Groups at the national and provincial levels to incorporate quality improvement as a fundamental health system function.

For more information on ASSIST’s work in South Africa, please contact assist-info@urc-chs.com [1].

The USAID ASSIST Knowledge Portal is made possible by the generous support of the American people through the U.S. Agency for International Development and its Bureau for Global Health, Office of Health Systems. The information provided on this web portal is not official U.S. Government information and does not represent the views or positions of USAID or the U.S. Government. The USAID ASSIST Project is managed by University Research Co., LLC under Cooperative Agreement Number AID-OAA-A-12-00101.
