

Swaziland

ASSIST Swaziland is working to improve quality in the national voluntary medical male circumcision (VMMC) program by supporting this program to strengthen its management of quality assurance and quality improvement within the network of VMMC providers. ASSIST is also supporting the Ministry of Health to implement its national framework policy for improving the effectiveness, efficiency, and sustainability of in-service training; thus, building the capacity of the health workforce to deliver quality health services.

For more information on ASSIST's work in Swaziland, please contact assist-info@urc-chs.com [1].

The USAID ASSIST Knowledge Portal is made possible by the generous support of the American people through the [U.S. Agency for International Development](https://www.usaid.gov/) and its [Bureau for Global Health, Office of Health Systems](https://www.usaid.gov/bureau-global-health/). The information provided on this web portal is not official U.S. Government information and does not represent the views or positions of USAID or the U.S. Government. The USAID ASSIST Project is managed by [University Research Co., LLC](https://www.urc-chs.com/) under Cooperative Agreement Number AID-OAA-A-12-00101.
